

Open Position in Quality Management

Type: internship, master project

Company

Darix is a startup developing Vizir, a concept developed at the IVRL lab at EPFL in Lausanne. We are building an add-on unit for existing full face firefighting masks that provides firefighters with clear thermal vision in their field of view. This helps them to navigate comfortably in darkness and smoke, while keeping their hands free for performing their work.

Job

We are working hard on the product and preparing for the launch. We are going from prototype to product in a very short time and need someone to ensure the quality of the end-results.

Specific topics you'll be working on:

- Identification of the relevant regulations, norms and certifications and translate them into internal requirements
- Definition of a timeline and efficient processes required for respecting these
- Definition of tests necessary to validate if we are fulfilling the requirements

Your profile

- Engineering background
- Independent, sense of ownership and not afraid to take initiative
- Some enthusiasm about augmented reality and/or firefighting!
- Student, or recent graduate

We are looking for someone soon, 2 months minimum. if you are looking for a master project, we are happy to define it as such!

If interested please send a mail with a short motivation and CV to jobs@darix.ch. For more information on the company: www.darix.ch
